

MD. MONIR HOSHEN

MERN Stack Developer

Mymensingh - Bangladesh

+880 1771-909060 (WhatsApp)

getMonirr@gmail.com

 [GitHub](#) |  [LinkedIn](#)

Skills:

- **Expertise:** JavaScript, ES6, React.js, React Router, Context API, React Hook, Firebase, MongoDB CRUD, JWT, HTML5, CSS3 and Tailwind CSS, Bootstrap 5, React Bootstrap, Daisy UI, React router breadcrumbs
- **Comfortable:** NodeJS, Express.JS, MongoDB, Axios, React Query, REST APIs, Material UI, React Awesome Components, React Date Range, React Spinners, React Rating, Recharts, React tooltip, Sticky
- **Familiar:** TypeScript, Next.JS, React Redux, Stripe, Ant Design, MySQL, Redux Toolkit,
- **Tools:** React Developer Tools, Git, GitHub, Chrome Dev Tools, VS Code, Figma, Netlify, Vercel, etc.

Projects:

Foreign-Language-Camp [Full Stack]

[GitHub Server](#) || [GitHub Client](#) || [Live Site](#)

Features:

- Multi-Dashboard Functionality: Different Dashboards exist for students, instructors, and admin. Instructors can add and update their classes. Admin can make a user to admin or instructor.
- Seamless Card Payment Integration via Stripe: Secure and efficient card payment system Integration with Stripe. Students can hassle-free payments with a card for individual classes
- Optimized Class Display on the Classes Page: On the Classes page, show only the approved class and turn off the "add select" button if available seats are 0 or instructor or admin login.

Technologies: Stripe, Axios, React Query, React, React Router, Firebase, React Hooks, NodeJS, Express JS, JWT, MongoDB, Vercel, React-Icons, Dotenv, Swiper.JS, React router breadcrumbs, React Loader etc.

Edu-Toy [Full Stack]

[GitHub Server](#) || [GitHub Client](#) || [Live Site](#)

Features:

- Implement Authentication and hosting with Firebase. For state management, use React context API.
- MongoDB CRUD Operations apply using Express server with NodeJS. Also, integrate JWT for secure API.
- Only Logged User Can Add, Read, Delete, and Update their toys, not others. The back-end server has search, sorting, and limit functionality and an eye-catching breadcrumb on every routing page.

Technologies: React, React Router, Firebase, React Hooks, NodeJS, Express JS, JWT, MongoDB, Vercel, React-Icons, Tailwind CSS – Daisy UI, Dotenv, Swiper.JS, React router breadcrumbs, React Loader etc.

Chef Master [Front-end]

[GitHub Server](#) || [GitHub Client](#) || [Live Site](#)

Features:

- React router DOM for single-page applications and use Firebase for authentication and deployment. Also, implement a protected route so the User cannot view chef details without login.
- Users can download each or all blogs as a pdf on the Blog page using the download button.
- Users can register with their names and pictures. They can see a toast with a relevant message when they sign in, sign up, or sign out. Also, handle all errors very carefully and show them in UI.

Technologies: React, React Router, Firebase, React Hooks, NodeJS, Express.JS, React Spinners, Env Variable etc.

Education:

- Master of Science (M.Sc.) in Mathematics
National University

2019 - 2020

Course:

- Complete Web Development Course
Programming Hero

Dec, 2022 - Present

Language:

- Bangla – Native
- English - Comfortable
